NAS

SEATING /Chairs & Benches

Pere Cabrera

2012

Summary

NAS is a molded reinforced cast stone chair produced in just one piece which highlights its distinctive all round edge volume profile. Just one line resolves both the seat and backrest while the curved-shaped backside facilitates a comfortable sciatic support. A flexible layout allows for different compositions: as a unique stand alone element; as part of a set or aligned bench-like. Being a reversible design, it also permits a two-sided linking up of the 80 cm wide modules. Whether as an individual seat or arranged in rows, it offers a range of possibilities while stimulating users towards convivial and spontaneous encounters with others. NAS craves... company.

Anchored by 4 bolts screwed to the pavement, or to foundations under a covering of either compact sand or firm grass.

Manufactured within the standard chart of colors and stripped finishing.
